PNJ

Consumer Retail · LBO, Comparable / Precedent

Phu Nhuan Jewelry

PNJ valuation shows a clear ladder from sponsor floor to public-growth upside.

Outputs, VND per share

LBO	66.0k	+3.1%
Precedent	≈69.8k	+9.1%
Comparable	72.8k–74.3k	+14.9%
Price used	64.0k	11 Jun 2026

Key assumptions

LBO model	**Sponsor-return model**
Comparable model	**Public retail peer multiples**
Precedent model	**Control-premium transaction check**
Sponsor assumptions	**3.1% premium; 10.2x entry EV/EBITDA; 7.5x exit EV/EBITDA**
Why methods differ	**LBO < precedent < comparable**

Conclusion

PNJ now has a three-step valuation ladder: LBO is the sponsor floor, precedent is the middle control-value check, and comparable analysis is the higher public-growth case.

Key risks

1. Comparable value can overstate upside if peer margins, growth, or market structures are not truly comparable.
2. LBO value is sensitive to exit multiple, leverage capacity, and retail cash-flow resilience.
3. Gold price volatility, consumer demand, inventory management, and store productivity are key operating risks.
